**M**y maternal granny is called Lulu. She is seventy-nine years old and lives in Mei Foo on Kowloon side. She is short and fat with short, curly hair. She has big eyes, a small nose and a small mouth. It is very funny that she will remove her dentures from her mouth every night before bed so she can wash them under the tap.

I go to my maternal granny's home for dinner every Saturday and we also have Chinese tea on Sundays. She is very smart and knows how to say "eat" in English although she had not learnt any English before.

She is a good cook and I enjoy her cooking very much. Every time when I eat dinner at her house, she will cook my favourite food, such as tomato with fish, pumpkin and eggplant.

My maternal granny is simply great and I love her very much.
