

Crystal Babies

- Silky Ho (L3) -

29th June 2008

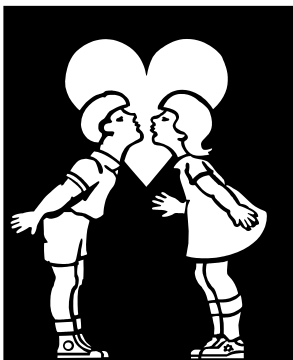

“Crystal Baby” is a kind of toy in jelly form that you cannot eat. It is made in Taiwan and they are one of the Taiwanese children’s favourite toys. *“Crystal Babies”* have a lot of colours like white, red, green, blue, yellow, orange, purple and black. There is also one which has no colours.

My biggest *“Crystal Baby”* is colourless. I once tried putting a blue *“Crystal Baby”* into some green liquid and it turned yellow. Isn’t it fantastic? I bought the *“Crystal Babies”* near a stationary store in Sai Kung, where my maternal grandparents live.

Do you know how to make and keep the *“Crystal Babies”*? Let me tell you.

First, put the *“Crystal Babies”* into a big bowl. Next, fill it with some water, and the water has to cover the *“Crystal Babies”*. When you see there is no more water left after a while, you have to add more water. Let the ‘babies’ grow.

When the *“babies”* become bigger, some of them will stick to each other, and they will kiss. Later they will even have babies, at least four.

It is amazing!
